XIT Communications' APMAX New Voice Mail

TUTORIAL:

XIT Communications' new Voice Mail provides a convenient tutorial to assist you in the initial setup of your new voice mail service.   The tutorial will instruct the subscriber in the step-by-step process for setting up their password, greeting and name. The initial default security code is 0000# and will need to be changed during the initial setup tutorial. Have a new 4-digit number in mind to use as your new personal password code prior to starting the initial voice mail setup. Note: Your mail box number is your 10-digit phone number.

How to access your new APMAX Voice Mail:

Any of the following options will allow you to access your new voice mail. The system will prompt you through the initial set up and menu options.

1. From the phone number that has voice mail, dial *11, this will take you directly into the voice mail initial setup or menu prompts.

2. Using the phone line that has voice mail, dial that phone number.
   Example: 244-1111 dials 244-1111

3. Dial the new APMAX voice mail phone number: 844-1999 from a landline phone or 806-844-1999 from a wireless phone. This will take you right into the new XIT voice mail system and will allow you to enter a phone number of the voice mail you wish to check. It will prompt you for your password followed by the # key. The default password is 0000#.
